What type of comments should I provide?

The public has an opportunity to provide input at key phases of the Environmental Impact Statement (EIS) process:

* **During the public scoping phase**, the public helps identify the scope of analysis, environmental resource areas, and potential alternatives to be analyzed in the EIS.

* **When the Draft EIS is available**, the public evaluates and comments on the analysis of the proposed action and alternatives and the potential impacts on environmental resource areas.

The Navy appreciates your time and input.
